

Fibre

Royale Black – PF401

Product profile

PF401 is a high end speciality black in our product range. It provides significant advantages to fine denier polyester fibre spinner & masterbatch producers. Its ultra-physical cleanliness increases melt fibre life by reducing plugging resulting in low production cost fibre manufacturing.

Morphological properties of PF401 are balanced in such a way that it provides a good combination of blue tone, dispersibility, dilutability & colour strength with extremely low filterability. With PF401, high spin pack life can be achieved by polyester fibre producers. It provides very low consistent fine screen Delta P in PET, PBT & PP base polymers.

Typical Value

NSA m ² /g	STSA m ² /g	OAN CC/100g	Tint Strength % ITRB	Sieve Residue 325M, PPM	Heat Loss (as shipped) %
111	97	103	104	16	0.6

Application Field

Typical Application	Recommended Dosage
PET / PBT Fibre	30%

Recommended dosage can vary depending upon end use & modification of other ingredients.
Packaging - 25 kg paper bag or 500/1000 kg bulk bag.
